Summary

Data Analyst, Emerging Category Intern candidate with experience in SQL, Power BI, and Excel to clean, analyze, and visualize business data. Known for building clear dashboards and stakeholder-ready insights under ambiguity. Interested in consumer insights and Business Analytics supporting and supply chain decisions.

Education

- M.S., Information Technology (Data Analytics), Middle Georgia State University — Expected Dec 2026 • GPA 4.0
- A.A.S., Information Technology (Web Development), Gwinnett Technical College — Dec 2024 • GPA 3.96

Relevant coursework: Programming for Data Science Statistical Data Analysis Machine Learning
Decision & Predictive Analytics Database/SQL IT Project Management

Experience

IT Intern — Fulton County

Jan 2024 – Apr 2024

- Standardized IT asset/network inventory records, improving data consistency and audit readiness across departments.
- Built reusable checklists/reference guides, reducing rework and review cycles by ~20–30% for internal teams.
- Gathered data from multiple systems and stakeholders to support inventory standardization and reporting.

Floral Assistant — Kroger

Dec 2022 – Aug 2023

- Reconciled inventory/pricing/shrink records, improving reporting accuracy and exception visibility.
- Supported exception handling and markdown timing using validation checks, reducing waste and margin loss.

Projects

1. Flight Price Analytics | Python • SQL • Power BI

Jun 2025 – Nov 2025 [GitHub link](#)

- Processed thousands of price records into reporting-ready SQL tables for trend insights and route performance analysis.
- Built Power BI dashboards with refreshable visuals for pricing trends, seasonality, and KPIs.
- Added data quality checks (duplicates, missing values, outliers) to improve reliability.

2. Floral Dept Daily-SKU Analytics | Python • SQL • Power BI

May 2025 – Jun 2025 [GitHub link](#)

- Built Power BI KPI dashboards for daily SKU performance, inventory performance, shrink, and exceptions.
- Created SQL views to standardize tables and surface drivers (stockouts, short-dated items, shrink).
- Wrote a 1-page playbook with metric definitions, report usage, and recommended actions.

3. Sumryze – AI SEO Reporting Dashboard | Python • OpenAI API • NLP • Next.js • Vercel

Jun 2025 – Present [GitHub link](#) | [Live Dashboard](#)

- Built an AI-powered dashboard that automates performance summaries and next-step recommendations, cutting manual reporting ~50%.
- Implemented API-based data processing and metric definitions to improve consistency for stakeholder updates.

Skills

- Consumer & Market (Category) Analytics:** consumer analytics/insights, market & sales trend analysis, KPI tracking, insight → recommendation.
- Reporting & Presentations:** Power BI (Power Query, DAX), Tableau (basic), dashboards, executive-ready charts, stakeholder presentations.
- Data Cleaning & Preparation:** data wrangling, joins/merges, validation checks, handling incomplete data, documentation.
- SQL + Excel:** SQL (joins, aggregations, CTEs); Excel (PivotTables, XLOOKUP, charts).
- Operations/Supply Chain Analytics:** inventory/shrink exceptions, process metrics, cross-functional reporting (operations/product development teams).

Certification

Web Site Developer Certificate — Gwinnett Technical College, May 2024
