Summary

Data Engineer candidate with hands-on experience building cloud data pipelines, analytics-ready datasets, and BI reporting layers using Python, SQL, Azure, Databricks, Airflow, dbt, and Power BI. Skilled in API ingestion, data cleaning, validation checks, dimensional modeling, workflow orchestration, and clear technical documentation.

Skills

- **Languages:** Python, SQL, R, basic JavaScript, PHP
- **Cloud & Platforms:** Azure, ADLS Gen2, Azure Data Factory, Databricks, AWS S3, Redshift
- **Data Engineering:** API ingestion, ETL/ELT, batch pipelines, orchestration, data validation, CI/CD
- **Processing & Modeling:** Databricks/PySpark, Delta Lake, dbt, PostgreSQL, dimensional modeling, star schema
- **BI & Reporting:** Power BI, DAX, Power Query, KPI dashboards
- **Tools:** Airflow, Docker, GitHub Actions, Git/GitHub, VS Code, Jupyter

Projects

1. NYC 311 Service Requests Lakehouse | Azure • Databricks • PySpark • Delta Lake • SQL

Mar 2026 – Apr 2026 [GitHub link](#)

- Built an Azure-based medallion lakehouse pipeline for NYC 311 service request data using Bronze, Silver, and Gold layers.
- Ingested API data, stored raw records in ADLS Gen2, cleaned and transformed data with Databricks/PySpark, and modeled analytics-ready tables.
- Created dimensional models, data marts, validation checks, runbooks, architecture diagrams, and execution proof for recruiter review.

2. Cloud Flight Fare Pipeline | Python • PostgreSQL • dbt • Airflow • Docker • AWS/Redshift

Feb 2026 – May 2026 [GitHub link](#)

- Built an end-to-end batch pipeline for flight fare data with ingestion, staging, transformation, testing, and analytics outputs.
- Used Airflow to orchestrate pipeline tasks, dbt to transform and test models, and PostgreSQL/Redshift-style architecture for warehouse modeling.
- Added CI, documentation, local reproducibility, and proof queries to support production-style data engineering workflows.

3. Sumryze – AI-Powered SEO Reporting Dashboard | Next.js • TypeScript • OpenAI • APIs • Vercel

Jun 2025 – Present [GitHub link](#) | [Live Dashboard](#)

- Built a SaaS-style analytics dashboard for automated SEO reporting, AI-generated summaries, and client-ready insights.
- Implemented API-based workflows, dashboard UI, analytics views, and AI-assisted reporting features.

Experience

IT Intern — Fulton County

Jan 2024 – Apr 2024

- Standardized IT asset and network inventory records, improving data consistency and audit readiness across departments.
- Gathered and reconciled data from multiple systems to support inventory standardization, reporting, and reusable internal documentation.

Floral Assistant — Kroger

Dec 2022 – Aug 2023

- Reconciled inventory, pricing, and shrink records to improve reporting accuracy and support exception tracking.

Education

- M.S., Information Technology (Data Analytics), Middle Georgia State University — Expected Dec 2026 • GPA 4.0
- A.A.S., Information Technology (Web Development), Gwinnett Technical College — Dec 2024 • GPA 3.96

Relevant coursework: Database/SQL
Machine Learning

Programming for Data Science
Decision & Predictive Analytics

Statistical Data Analysis
IT Project Management

Certification

Web Site Developer Certificate — Gwinnett Technical College, May 2024

Affiliations

- AITP | Phi Theta Kappa
